Personal data

As a highly detail-oriented and multitasking computer science student with exceptional coding techniques, I am currently pursuing a Bachelor of Technology degree in Computer Science and Engineering. I possess comprehensive knowledge of primary programming languages such as Python, C, C++, and html, and have a special talent for writing highly competent programs. I excel at presenting information clearly and making it understandable to others. Additionally, I am able to deliver the best results even under pressure.

Education

●Wuxi TaiHu University: September 2023-present

Bachelor of engineering, Scotland Academy.

●Wuxi NO.1 Grils' high school: September 2020 – June 2023

High school certificate

Key skills

●Python	●C	●C++
●Data Analytics	●HTML & CSS	●Java
●Web	●Software engineering	●Mathematics

Certification

•Third prize in the Scotland College English Dubbing Competition   April 2024
•Second prize scholarship to Wuxi Taihu College   October 2024
•Single award student work activist to Wuxi Taihu College   October 2024

Projects

•Computing Systems
An introduction to computing and its history. Inside the CPU: Transistors, circuits and their logic. Memory. Secondary storage and file systems. Compilers and interpreters. Operating system and virtual memory. Input/output and gaming. Networks/network security/application security.

•**Introduction To Programming**

Programming refers to the ＂process or activity of creating computer programs＂. A program is a set of written instructions that enables a computer to carry out a specific task. In this course, I will learn how to make my computer perform various tasks within the context of Python.

•**Introduction To Web Development**

Obtain a basic understanding of the World Wide Web and client-server architecture. Utilize markup languages and stylesheet languages, namely HTML and CSS. Practice good UI (User Interface) and UX (User Experience) design. Use basic JavaScript to enhance the interactivity of your web applications.

Training

Wuxi YunXiang continuous casting machinery Co., LTD- Accounting Intern   June 2024-July 2024

● Use financial software (such as Kingdee Cloud accounting, UFida financial software, etc.) for accounting processing, including voucher entry, book query, etc., proficient in software operation process, improve the accuracy and efficiency of financial data processing.

● With the powerful data processing function of Excel, financial data analysis and report making. Use functions (such as SUM, VLOOKUP, IF, etc.) for data summary, search and logical judgment.

Activities/Positions of responsibility

Position:
Learning department officer: September 2024-present
significant involvement in the student Union

Activity:
● Evening party to welcome newcomers：   November 2023
rationally assigned team work according to the work tasks of the Student Union, followed up the activity process and assisted the team to achieve 100% of the target and make the party a success.
